

AlcoScan Bill/Coin-Op Breathalyzer

Model: AL3500-XX

ASD

Advanced Safety Devices

The AlcoScan Coin/Bill-Operated Breathalyzer is perfect for any bar, restaurant, club or any other establishment where alcohol is served

The AL3500 coin / bill operated bar breathalyzer is designed with public safety in mind. It will enhance the positive image of alcohol serving businesses as well as being a great source of revenue. Local bar owners and entertainment clubs have always been concerned with the safety of their customers. AL3500 empowers customers to make informed decisions.

Responsible bar owners can now install the AL3500 breathalyzer machine and allow their patrons to test their BAC level.

Installing the AL3500 breathalyzer machine in your bar, club or banquet hall is not only a fun source of revenue, but also a smart decision for ensuring the well-being of your patrons, business, and the community.

Benefits

- Make money and save lives!
- Replacing the sensor module is fast and easy
- No calibrations - no downtime, no loss of revenue!
- Perfect for bars, pubs, clubs, restaurants, and shelters
- Uses normal drinking straws
- Universal AC 90 - 230V operation

Replaceable Sensor Saves Time & Money

The pre calibrated, field replaceable sensor has eliminated delays and complications of re calibration by allowing users to simply "snap out" an old sensor module and "snap in" a new module. Restoring a reliable, accurate testing unit takes only a matter of seconds. This will restore the unit back to its condition as new from the factory.

Make Money and Save Lives!

Placing the AL3500 breathalyzer machine in your business is the perfect opportunity to promote safety among your patrons while generating additional revenue.
