

Unlike other breathalyzers, the AlcAlert BT5500 does not require mouthpieces to maintain safe & sanitary conditions.

Why leave safety to chance? Let AlcAlert BT5500 breathalyzer keep you alert, even if you had one too many. Compact and highly accurate semiconductor based technology comes to help responsible drinkers stay ahead of any accident - while driving or operating heavy machinery. With AlcAlert BT5500 you can make a more informed decision as to your mental condition with respect to safety and the law.

The AlcAlert BT5500 is a reliable safety device that measures Blood Alcohol Concentration (BAC). Simply exhale into the unit and within seconds the LCD displays a precise measurement of your BAC.

The AlcAlert BT5500 is a very compact and effective screening device that responsible drinkers can't afford being without. Don't guess, verify if you or someone else is in a safe mental condition to drive or operate machinery.
